Given the state of affairs around the spill please only refer people to the web site. Thanks

Hi Azra – This sounds great!

Just an FYI – I won't be able to speak on the Gold King Mine Spill, especially since I was not directly involved with the response efforts. I may state that upfront in my presentation so I don't receive questions I won't be able to answer. I can include a slide in my powerpoint with EPA's Gold King Mine Spill Website as well as the toll free number if people want more information?

Hi Melissa,

Since your title is all abbreviation, I am guessing it is code for federal rules and spill related talk. I hope you can briefly mention on the Mine spill recently took place as you may get some questions on that. The speakers use PowerPoint presentations and we have projectors and computers in the room panel will be held. If you prefer, you can even make the presentation from your own laptop. If you can share your pdf with us after your presentation, it will be very helpful. Before the meeting, you can bring your presentation with you for the lunch and we can continue afterwards. Thanks again.

Cheers,

Azra

Hello Azra – looking forward to meeting you on September 11th. I have a draft presentation and right now the title is 40 CFR 112 SPCC/FRP & GIUEs. If for some reason that changes I will let you know ASAP. Quick question, since we only have 10 minutes to present, are speakers using PowerPoint to present their topic or is the presentation all done verbally?

If so does the PowerPoint need to be sent to you by a certain date?

Melissa

Dear Kathie,

I am glad Melissa will be able to join us and can speak at the Panel Session. Whichever is suitable for EPA, it is fine for us. If your other colleague can join us for any questions later, he/she is welcome. We appreciate the time Melissa and others will put into this collaboration. I would like to thank you for helping us identifying a speaker at EPA.

Hello Melissa,

Looking forward to meeting you and thanks for taking time to join us. Could you send me the title of your presentation so I can include you in the agenda? I must remind you that every panel speaker will be asked to speak ~10 minutes and once everyone is done, then open up for questions and discussions. If your colleague cannot attend, then we can ask a few questions before you leave.

Cheers,

Azra

Hi Azra,

Melissa Payan, our Oil Program Coordinator for Region 8, will be able to attend as a speaker on 9/11 for your workshop. The only thing is that she will need to leave early

(~3:30 PM) so if you could have her on early in the session that would work better for her schedule. If you need someone to stay for any questions that might come up on the panel after 3:30 PM, we can send another person who will back her up. Otherwise, if you are ok with her leaving at that time, she will be the only one to attend for EPA. Please let me know if that will work for you. I have copied her as well, so you have her contact information.

Thanks,

Kathie

Subject: EPA Speaker Invitation for TOPCORP Regulatory Workshop at Colorado School of Mines

Dear Katie,

Finally I have a draft agenda for the September event.

I would like to cordially invite you to be one of our distinguished speakers for our TOPCORP regulators pilot training panel session to be held on September 11 in the afternoon. You are also invited the lunch on Friday as well as the Event dinner after the Panel Discussions.

We will have another TOPCORP training session at CSM campus on September 9-11, this time for our joint domestic regulator training session organized by CSM UNGI in

partnership with Penn State and UT Austin. We have recently developed an online curriculum on the geology and petroleum technologies. There are about 40 regulators joining us from several states including Colorado, Texas and Pennsylvania plus one or two from Alberta, Canada.

All participants are currently taking Module I and Module II of the TOPCORP training currently online, then will arrive to CSM campus for the field trips, QA sessions, laboratory sessions and Panel session after completing the online portion and score 100% in the final test.

The field and lab session and small lectures all will be completed by lunchtime Friday September 11 and a panel with several speakers in the afternoon is scheduled followed by discussions and then event dinner. Hope you can join us as one of our distinguished panel speaker. Attached is a draft agenda. If you can provide me a title for your presentation (as you suggested in your e-mail, "Spill Prevention Control and Countermeasures (SPCC) oil regulations, Facility Response Plan (FRP) regulations, and Government Initiated Unannounced Inspections (GIUEs)" is a great topic to talk about. Another related case study I am confident everyone would be very interested to hear from EPA colleagues is "what happened in the Animas River spill from the mine and what are the risks involved and how to clean up" if you are allowed to talk about it.

The presentation should be about 10 minutes as we have several speakers lined up at the panel session. Looking forward to hearing from you soon and seeing you at the TOPCORP event. Hope you can spare time to join us on September 11 starting lunch time and stay later for the Event dinner as well. Have a great day...

Cheers,
Azra

No problem Katie. Thanks for informing me on the topics you can come in September.

I will communicate with you on the draft agenda once we start building the agenda.

Have a great weekend.

Cheers,

Azra

Hi Dr. Azra Tutuncu,

Unfortunately we don't have anyone available to speak in July, however, if you need someone in September we might be able to make that panel session. I'm unsure what the focus you would want us to cover other than our regulatory program and what the requirements are? We could also talk about what items we look for when we do inspections? I'm assuming you would want us to talk about the oil programs that we regulate and implement, so we could cover the Spill Prevention Control and Countermeasures (SPCC) oil regulations, Facility Response Plan (FRP) regulations, and Government Initiated Unannounced Inspections (GIUEs). Let me know for sure and whether you would still be interested for the September time frame.

Thanks,

Kathie

Subject: EPA Speaker Invitation for the UNGI-UGTEP Regulatory Workshop at Colorado School of Mines

Dear Kathleen,

We have a regulatory training workshop (UNGI-UGTEP) sponsored by Department of State scheduled on July 6-11 at CSM campus (CSM alone unlike our TOPCORP effort with UT and PSU) and will have regulators from about 10 countries (international) to be here to get technical training and field trips. With help from Cindy Beeler, we had a presentation last winter from an EPA manager and Cindy had also attended the panel session last time. We will have the panel session scheduled on Friday July 10 all afternoon with also guests from industry and local regulatory communities (COGCC, COGA, USGS and EPA?) to have presentations and discussions on technical, regulatory aspects and industry practices in the US. Would you like to participate as our guest to the lunch and afterwards stay for the panel session and the event dinner? I also invited Cindy and her boss (Joan). Attached is the current draft agenda for the event and not containing the speaker details at this time for the panel session. Have a great weekend.

On another note, we have made significant progress on TOPCORP online class for Module I and II and these modules will be released in July. As a follow up, we will have the TOPCORP regulators event for 3 days scheduled on September 9-11 and will have a panel session as well.

Cheers,
Azra
